EDUCATION

Christopher Newport University | Newport News, VA

B.S. in Computer Science | GPA: 3.5

May 2026

Relevant Courses: Data and File Structures, Discrete Structures, Intro to Programming, Intro to Software Engineering, Programming for Applications, Programng for Data Manipulation, Algorithms, Digital Logic Design, Programming Language Concepts, Computer Ethics, Theoretical CS, C++, Operating Systems, Database mmgmt

TECHNICAL SKILLS

Programming Languages: Java, Python, C++, HTML, CSS, C#, JavaScript, SQL

Technologies & Libraries: Git, NumPy, Matplotlib, JUnit, CSV, Datetime, Pandas, os, Flask, MongoDB, Gradle, pip, Spring, PyTorch, Tesseract, OpenCV, Pillow, SQLite, MySQL, MongoDB

Certifications: AWS Certified Developer – Associate (July 2026)

RELEVANT EXPERIENCE

Family Medicine Healthcare | Software Engineer | Chesapeake, VA

May 2026 - Present

- Built a HIPAA-conscious medical document processing app with React/Electron, Spring Boot, SQLite, and Python to upload scanned files, convert TIFF/PDFs into previews, review extracted patient data, and prepare documents for EHR attachment.
- Integrated local AI workflows using Ollama and a custom PyTorch classifier to identify document types and extract patient fields such as name, DOB, date of service, and document name while reducing PHI exposure.
- Planned a secure AWS deployment using EC2, encrypted EBS, HTTPS, restricted security groups, API-key authentication, audit logging, file deletion rules, and AWS Artifact BAA review for HIPAA-aligned testing.

Gnarly Bros. Detailing | Software Developer | Suffolk, VA

May 2025 - August 2025

- Designed and developed a full-stack business website for Gnarly Bros, featuring service information pages and a dynamic appointment-booking system backed by MongoDB.
- Implemented a secure server-side scheduling workflow that processed client appointment requests, generated confirmation emails for customers and the business, and automated RSVP creation via the Google Calendar API.

JK Technologies | Network Specialist Intern | Newport News, VA

June 2024 - Aug 2024

- Gained hands-on experience in networking fundamentals during a 12-week IT internship, assisting with IP addressing, subnet masking, SonicWall firewall configuration, server deployment, and critical network component setup.

PROJECTS

Personal Portfolio Website | JAVASCRIPT, Java

Dec 2025

- Built and deployed a full-stack developer portfolio using React, Vite, Spring Boot, and Railway to showcase projects, technical skills, resume information, and GitHub activity through a responsive user interface.
- Integrated a custom backend API with the GitHub API to dynamically retrieve and display repository data, including project descriptions, programming languages, and recent commits.

EHR AI | JAVASCRIPT, JAVA, PYTHON

Jan 2026- May 2026

- Created a full stack application using React and electron for the frontend and a RESTful API with Spring Boot Java and Python Flask with a SQLite Database.
- Developed an OCR processing pipeline using Pillow, OpenCV, and Tesseract to clean scanned TIFF documents, extract text, and process multi-page files
- Implemented a machine learning classification service using PyTorch to train a model to identify document type with confidence scoring and ranked alternatives
